

# The Most Neutral Self Cleaning Glass

## The most neutral self cleaning glass available

No unsightly tint or reflective surface unlike some 'easy-clean' products which may require re-application

### Less Frequent cleaning

Windows stay cleaner for longer, saving you money in cleaning bills

### Much easier cleaning

less dirt and grime adheres to glass

### Permanent Coating

lasts the lifetime of the glass

Also available  Clearview<sup>plus</sup>

Clearview with a Neutral Heat Reflective Coating reflects up to 62% heat from the sun and reduces glare by over 66%

*(ask your salesman for Clearview Plus brochure)*

 Clearview<sup>©</sup>

Clearview, Self Cleaning Glass will change the way you clean your windows . Designed for external use, either in commercial or domestic projects.

## How it works....

- 1** Coating is fully activated after 5-7 days of exposure to daylight
- 2** Exposure to the UV rays present in daylight triggers the decomposition of organic dirt on the glass and causes the surface to become water resistant
- 3** The coating on clearview causes rainwater to form a sheeting effect. Broken down dirt and other deposits are washed away from the glass.  
*(In cases of prolonged dry spells or when glass is extremely soiled, hosing down of the glass will remove the dirt)*

Clearview can be combined with other glasses such as our high performance low-e glass, **THERMAGLAS**

 **Clearview**®
